Summary

Backend engineering student with hands-on experience building scalable REST APIs, async processing systems, and Redis-backed caching layers. Worked across Node.js, Python, and Flask backends with PostgreSQL, Redis, and cloud object storage. Seeking a Backend or Full Stack Developer Internship.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, Python, Java, SQL
Backend	Node.js, Express.js, Flask, REST APIs, JWT Authentication, RBAC, bcrypt
Databases & Cache	PostgreSQL, MySQL, MongoDB, Redis, Cache-Aside Strategy, TTL Caching
Async & DevOps	BullMQ, Celery, Docker, GitHub Actions, Swagger/OpenAPI
Cloud & Monitoring	AWS S3, MinIO, Prometheus, Grafana
Frontend	React, HTML, CSS

Projects

CloudStash | Node.js, TypeScript, PostgreSQL, Redis, S3, BullMQ, Docker [Live Demo](#) | [GitHub](#) *May 2026 – Present*

- Built a scalable cloud file storage backend with pluggable object storage drivers for AWS S3, MinIO, and local disk.
- Implemented S3 multipart upload with presigned URLs, routing uploads directly to object storage and bypassing the API server entirely.
- Set up Redis cache-aside layer with TTL invalidation for metadata queries, with PostgreSQL fallback on cache miss.
- Offloaded virus scanning and thumbnail generation to BullMQ async workers with retry logic and graceful shutdown.
- Implemented SHA-256 deduplication with cross-user blob sharing and per-user quota tracking.
- Documented APIs with Swagger/OpenAPI. Added Prometheus metrics, Grafana dashboards, Docker Compose, and GitHub Actions CI/CD.

AI Resume Analyser | Python, Flask, MySQL, Redis, Celery, Gemini AI [Live Demo](#) | [GitHub](#) *Mar 2025 – Present*

- Built Flask REST API backend with clean layered architecture (controllers, services, repositories, validators).
- Designed a weighted scoring engine that evaluates resumes against job descriptions, returning Hire / Improve / Reject output.
- Offloaded resume parsing and scoring to Celery background workers using Redis as the task broker.
- Applied Redis TTL caching to skip repeated processing for unchanged resume-JD pairs.

SkillMatch | Node.js, Express.js, MongoDB, JWT, React [Live Demo](#) | [GitHub](#) *Jan 2025 – Present*

- Built a job platform REST API with JWT-based RBAC across candidate, employer, and admin roles.
- Implemented skill-overlap scoring using referenced MongoDB collections with compound indexes to prevent duplicate applications.
- Managed application lifecycle (applied, shortlisted, rejected) through server-side status validation middleware.

Education

GH Rasoni College of Engineering & Management	Pune, Maharashtra
B.Tech in Information Technology CGPA: 8.13 / 10	<i>Expected June 2027</i>

Leadership

Design Lead, GeeksforGeeks GHRCEM Chapter *2024 – 2025*

- Led the design team. Produced event creatives and social media assets with consistent branding across all chapter communications.

Additional

DSA: Solved Data Structures & Algorithms problems across LeetCode and GeeksforGeeks (arrays, hashing, two pointers, sliding window). **Certification:** Microsoft Azure Fundamentals (AZ-900), coursework done, exam scheduled. **Open Source:** All projects on GitHub with READMEs.
